PARTIES AND THE TARRES. it is sufficiently known than The dama-stay has long questioned the wisdom of maintaining that extreme doptrine of protection which is advocated and defended by the high tariff men of both parties. It helicus there ough! by he revision and reduction. The first thing doub in this direction should be repeat of the sugar duty, releasing from tax this article of markersal consumption, so long kept at an excrittant price for the bound of a few danters in a single state. As to the duty on two, there is this difference, namely, that wood is produced in nearly at the states, and whatever benefits they be derived from the higher prices which protection is supposed to secure are distributed widely. Upon iron and sheet and irrouted which per a series of the four fit to be a care-ful readjustment of the addiest and fast now, when this industry, in all its branches, when this missery, it is the proper time of a proper time for it. All or nearly ill the prothurs of this great industry no new about astheap in the lamied Statescas in Great Briton, and consequently readjustment of the taciff, and thoughout readjustment of the taciff, and kings mercantile homes can be readily eswith judicious poluction, wan d nongive the American market at a time like this to British manufacturers. As the laws no stand the pro-ducers of from and steal get non-ly all, the benefits of protection, while the manufacturers of fits of protection, while the manufacturers of it—the makers of tools and ind Sements of machiner, burdwage and collers—get very few of thom. In many things the crude product is should not be encouraged, because if we accussion. it—the makers of tools and ind dements of machinery, hardware and cothery—get very lev of thom. In many things the crude product is princeted too anich and the finished and diversified product for little; so that he destrine of protection, as no maintained is incompitated for an advance and the opinion that there would soon be great the opinion that there would soon be great changes in the terril policy of the country. Public opinion seemed to be seding that way. But more recently it has amounted the policient longing a more epicient organization of the ribitia of the various states to suppress labor riots, one of the rijest scholars of the more recently it has amounted to he had been the provided of a protecting this had in against the fromoles of which is useful in against the fromoles of which is useful. We flitch his medical of any lich there are is an against the fromoles of which is useful. more recently it has appeared probable that the change would held long time coming about; and in fact it is now becoming appeared that protection is to be maintained for a long time retas the fixed policy of the country. In the great manufacturing states until or party dates to avow itself in favor of any policy that cambe designated by the name of free truty. Party con-siderations control the matter, Por example, there is ant one conceivable objection to free sugar, and that is the possible loss of the votel of Lyu-lei na to the democratic party. Again, a thought of the political consequence in states like Ohio and Oregon of his y relaction of the duty on wood will suggest it self in congress to control may action on that branch of the sub-

emplored in these discussions, are wanting in accurate definition. The meaning of each, as then we can tell what a free tracer is, what he wants to do and lave done and by contrast we can tell what a motectionist is and what he wants. In short, we may say it at trade is the when the parties to the trade are hamporasin the least possible manner, by any circumstandes that they do not control. When the ferrier goes to the village grocer and exchanges his potatoes for groceries, that is free trade in its simplest form. But when the farmer in the simplest form. But when the farmer in the west exchanges his farm projects with the manufacturers in the east for their products, the manulacturers in the east for the riproducts, the trade is free, but it is hampered by the fix of the ritway companies for feelight, and also the fax of good of a middle can to make the exchange, but still it is free trade. Now, if the people of our country wint to exchange products with the reciple of other countries, we find another obstruction find two campulaviols. We have decided and rightly to be to take our. Ve have decided, and rightly, too, to raise part of our revenue to support our national government by dulies (n imports. This is a tax just like the tax for freight, only id one case the railways receive the tax and in the other the shipowners receive the tax for freight, and the government receives the customs tax. Still this is free trade, because the parties of the trade cannot control the taxes. But when we case the duly to a high point with the object of keeping out the foreign product and making higher prices for the home product, that is pro-

this undergoes change. Alexander Hamilton was called a protectionist because he advocated was called a protectionist because he advocated a tariff that averaged about 5 per cent. This in 8, Morrill was called a protectionist borross he introduced a bill that averaged about 25 per cent. Bobert J. Valker was called a free trader because he get to a lariff that averaged about 19 per cent, and others are now called free traders because they propose an average scale of 30 per cent. Those change and fariff views change with them. After the traders because the propose an average scale of 30 per cent. change with them. Only the thing now seems contain in regard to the faith, on they is, that the people there resided to instant in the protective policy, in an estance, for a long time to come. Some modification of the present turiff, there and there, is all that can be expected.

With effect soul stry they have shown that it was inconsistent for anti-monopolists to helolar to a party which monopolists car orseat. The New York Tribo and lows how files this falk was. General Sheridan, in his manual report 1974 b secretary of war, expresses great interest in the national guard of the states, and thinks that congress should to spurching to price it upon a congress should do spirithing to price it upto a good footing, as a meast re of protection again at domest c troubles, of which, he says, there are signs, but hopes then will not occur, and thinks there probably will not, if both, capital and labor will only be conservative. But if by any chance they should occur, the hyporel would be his remedy. We cannot express our own view of this subject so clearly, and by no means to telicitously as Mr. Lowell has done in his Hirmingham address. In the first place, as this Birmingham address. In the first place, as that the unifortunes hardest to hear are it ose that the inisfortunes hardest to hear are it ose that never come." The troubles which General Sheridan antidipates in view of the said growth of the hatton will herer come unno-voked. And the fewer soldiers there are sat-tered around the country the less likely they will be to come. For it the capitalists are assored that they can only be armed as he is armed "who hath his quarrel just," working-men will not carry dynamics in the pockets' their clothing. ""Our healing," as Mr. Lowell truly says, "Is not in the storm or in the whirlwind; it is not in monarchies or aristocrael s or democracies, but will be reached by the st. What is really ominous of dander to the existing order of things, he says, "is not denoe-racy—which, properly un lerstood, is a care-structive force—but the sciulism which may find a februar in it. If we cannot equalize conditions and fortunes any more than we can equalize the brains of men, we can yet, perhaps, do something to correct those methods and influences that lead to enormous bequalities and to prevent their growing more enormous. And while he does not agree with Mr. George that land should be divid if because the quantity of it is limited by nature. he nicku owledges that Mr. George is right a insisting that formanity makes a part, by far the most important part of political economy, and in thinking man to be of more condern at d more convincing than the longest columns of and the continuous continuous continuous figures in the world. LESSON TO BOTH PARTIES.—Willie Sullivin and Kinnie Crummite, the two boys arrested upon comp aint of the Transcontinental street ear compart, for disorderly conduct in jumping on street cars and "stealing a ride," were not tried for the misdemeanor, the case being dismissed in the police court restered. The arrest was caused by the fact that young Sullivin had been I radio of Assistant District Attorney Hewitt bad sworn out a complaint of assault and battery before Justice Greene. The driver was fined \$10, and Hewitt went half for the boys, feeding that he had brought their arrest about, nithough perfectly assified as a matter of right, in so doing. The boys paronis am poor, and a fine would week a great hardship to each household, while to imprison two height school children for so trivial at offense would is since that of criminality. Chasquestly, Judge Moreland, dismissed hoth cases. As it now stands, the effect of all this breaze in the courts will undoubledly be salutary to both parties. Now York, Nov. 18, suspecial will allowed sajet. The super trade is pre-sing through our of throse prolonged is also of singuation into which a market sometimes settle, and out of which it is so difficult to retire it. Prices are lower than they have seen before in hirty or first years, and while the members of the trade prolose to believe in a tevisal of business, there are as yet fow signs of improvement. Still, this is the very duffest senson of the year, and, as wasted, many reflected are closing temporarily for rogains and improvements. Several have dones in the Philadelphia and Boston. To cause

advantage in larger cities, in pointed of the great west.

Bishop Ireland, of St. Paul, spoke of the effort to better the condition of the Irish pumple, who bear an insignificant sharin in the polonization of the west, and stated that if the present toportunity is holeseized, after a few rears the lands will be beyond the reach of the power classes. He suggested that wealthy catholics in the principal cities be invited to form a syndicate with a capital of a \$1,000,000 for the purchase of lands, the subscribers to hold title and have exclusive finalicial management, and abundant security, for capital so employed industrialy demonstrated the profitable results of the efforts of the present association.

Bishop Marty of United spoke of opportunities in his diocese, as did also lished Machabount of Benner, of their sources of Co orado.

Bishop Spanking stated that turchun had come cast for the puripse of laying the matter before capitalists in the principal cities, and instituted to co-peratum. The meeting then adjourned.

The RAILWAY MAD. SERVICE.

WYSDINGTON, Nov. 18.—W. R. Thompson, general superintendent of the railway mail service, has submitted his annual report. If appears that on June 30, 1884, there were 117,189 miles of railroad upon which mails were carried, as compared with 78 miles in 1881. Puring the last fiscal year the increase was 6592 miles. The number of railway-postofiles lites in operation June 20, 1884, was 845; annual miles of service, 92,640,099; untuler of cassadities during the year 154, in which even postal clerks were Elibal, twenty-eight seriously injured and sixty slightly injured. Restituently injured and sixty slightly injured. Restituently injured and sixty slightly injured. Restituently and the post of the wildows or minor children of all clerks killed in the service a sum equal to one year's salary of the grade to which the check belonged at the time of lefs leath. An additional appropriation of 1881,300 is recommended, for the purpose of increasing salaries of clerks of class 5 and 4, 31490 and 31290 per annum, respectively. Juring the year the far-braal service has been greatly improved, without increase in oest to the department. It seems probable that the post-master reported, without increase in oest to the department. It seems probable that the post-master reported, without increase in oest to the department. It seems probable that the post-master control will soon be able to have the fast-mail arrays at Oma a much cartlet than it now does. It is known that mails can be expidited so as to arrive at Sax Francisca about 7.4. M., instead of 11:10 A. M., as at present. City mail can be delivered immediately upon arrival, in time to get replies ready for the each-bount mail the same day, which will be equal to strong one day between New York and San Francisco, is now must one directly the factors of the time of the same of the care.
